Electric Vehicle Market Performance & Insights

Tableau Worksheet Design

Repository: https://github.com/manasgite54-cmd/EV-project

Purpose and Context

Worksheets should each answer a focused question and be assembled into the dashboard only after their calculations and units are validated. Descriptive counts of records must not be labelled as sales, production or market share unless the source explicitly supports those meanings.

Detailed Project-Specific Content

- Manufacturer comparison: sorted bars using record count or a verified metric. Explain any Top-N cutoff and show sample size.
- Model-year distribution: group records by model year; check missing, partial and implausible years before interpreting trends.
- Vehicle category comparison: compare counts/shares with the denominator and treatment of unknown categories documented.
- Battery type distribution: use category counts only after verifying that labels represent comparable battery types.
- Battery capacity vs range: use a scatter plot only when both fields are numeric and units are consistent.
- Price vs range: document currency, price basis, market and date; investigate outliers before drawing conclusions.
- Customer rating: show the rating scale and number of rated records; do not imply representative consumer preference without sampling evidence.
- KPI tiles: use transparent measures such as processed records or validated medians; label each aggregation and unit.
- Worksheet standards: descriptive titles, readable axes, tooltips defining measures, consistent colors, clear null handling and a source/limitation note.
- Validation: compare worksheet aggregates with independent Pandas or SQL calculations using identical filters. Actual worksheet count and chart outputs should be verified in the Tableau workbook.

Project References and Artifact Locations

Project: Electric Vehicle Market Performance & Insights Repository: https://github.com/manasgite54-cmd/EV-project Processed dataset: data/processed/ev_market_clean.csv Reported processed records: 299,999 Cleaning report: data/processed/cleaning_report.json Tableau Dashboard: https://public.tableau.com/views/Book1_17931030431560/EVMarketOverview?:showVizHome=no&:embed=yes Tableau Story: https://public.tableau.com/views/Book1_17931030431560/Story1?:showVizHome=no&:embed=yes Accuracy note: the record count and artifact paths above are reported by the project owner. Exact schema, source provenance, units, calculated statistics, test results, and deployment status must be checked against the repository and actual artifacts. No unsupported results, approvals, or signatures are claimed.

Status: Detailed project-specific document. Any [TO BE PROVIDED], [TO BE VERIFIED] or [TO BE CALCULATED] item requires confirmation. No supervisor approval, signature, unverified test pass or successful deployment is implied.
