Electric Vehicle Market Performance & Insights

Dashboard Design and Interactions

Repository: https://github.com/manasgite54-cmd/EV-project

Purpose and Context

The dashboard should provide a clear overview before users move into detailed comparisons. Its hierarchy should make the dataset scope, metrics, filters and caveats easy to understand.

Detailed Project-Specific Content

- Recommended layout: project title and scope note; KPI tiles; manufacturer/category comparison; model-year distribution; technical/commercial relationship chart; source note and limitations.
- Filter controls may include manufacturer, model year and vehicle category when those fields exist. Place controls consistently and provide a reset/default state.
- Interactions: selecting a category or manufacturer should update relevant views; clearing filters should restore the default state; tooltips should match underlying records; and unrelated KPIs should not change unexpectedly.
- Formatting: consistent fonts, meaningful color mapping, readable labels, units in axes/titles and accessible contrast. Avoid color as the only signal.
- Performance: avoid unnecessary marks and high-cardinality labels. Test the published dashboard in desktop and narrow browser sizes.
- Embedding: use the supplied Tableau URL in a responsive Flask container and display a direct-open link if the embed is blocked.
- Verification: dashboard URL is supplied, but visual accuracy, exact values, filters and responsiveness must be tested against the published view before submission.

Project References and Artifact Locations

Project: Electric Vehicle Market Performance & Insights Repository: https://github.com/manasgite54-cmd/EV-project Processed dataset: data/processed/ev_market_clean.csv Reported processed records: 299,999 Cleaning report: data/processed/cleaning_report.json Tableau Dashboard: https://public.tableau.com/views/Book1_17931030431560/EVMarketOverview?:showVizHome=no&:embed=yes Tableau Story: https://public.tableau.com/views/Book1_17931030431560/Story1?:showVizHome=no&:embed=yes Accuracy note: the record count and artifact paths above are reported by the project owner. Exact schema, source provenance, units, calculated statistics, test results, and deployment status must be checked against the repository and actual artifacts. No unsupported results, approvals, or signatures are claimed.

Status: Detailed project-specific document. Any [TO BE PROVIDED], [TO BE VERIFIED] or [TO BE CALCULATED] item requires confirmation. No supervisor approval, signature, unverified test pass or successful deployment is implied.
