Electric Vehicle Market Performance & Insights

Tableau Story and Narrative

Repository: https://github.com/manasgite54-cmd/EV-project

Purpose and Context

The Story should guide users from dataset context to comparisons and then to a balanced interpretation. Each story point should pose one question, show a verified view and state the limitation of the evidence.

Detailed Project-Specific Content

- Point 1 — Dataset scope: explain record count, source, period, geography and record grain after confirming them.
- Point 2 — Manufacturer landscape: compare manufacturer representation; record frequency is not automatically sales or market share.
- Point 3 — Model-year pattern: describe the distribution by model year and note missing or incomplete periods.
- Point 4 — Vehicle categories: compare available categories and explain any consolidated or unknown labels.
- Point 5 — Battery and range: examine the relationship only if battery capacity and range units/definitions are comparable.
- Point 6 — Price and rating: describe distributions and eligible sample sizes; do not infer affordability or consumer preference without contextual evidence.
- Point 7 — Conclusions and limitations: summarize only verified observations and list what additional data would be needed for stronger claims.
- Narrative rules: use consistent measures across dashboard/story, add units and sample sizes, avoid causal language for correlations, and do not insert fabricated rankings or percentages.
- Review checklist: story points load, filters and tooltips behave, source notes are present, chart titles match measures and direct link opens.

Project References and Artifact Locations

Project: Electric Vehicle Market Performance & Insights Repository: https://github.com/manasgite54-cmd/EV-project Processed dataset: data/processed/ev_market_clean.csv Reported processed records: 299,999 Cleaning report: data/processed/cleaning_report.json Tableau Dashboard: https://public.tableau.com/views/Book1_17931030431560/EVMarketOverview?:showVizHome=no&:embed=yes Tableau Story: https://public.tableau.com/views/Book1_17931030431560/Story1?:showVizHome=no&:embed=yes Accuracy note: the record count and artifact paths above are reported by the project owner. Exact schema, source provenance, units, calculated statistics, test results, and deployment status must be checked against the repository and actual artifacts. No unsupported results, approvals, or signatures are claimed.

Status: Detailed project-specific document. Any [TO BE PROVIDED], [TO BE VERIFIED] or [TO BE CALCULATED] item requires confirmation. No supervisor approval, signature, unverified test pass or successful deployment is implied.
