Electric Vehicle Market Performance & Insights

Website Design and Integration

Repository: https://github.com/manasgite54-cmd/EV-project

Purpose and Context

The Flask website provides a navigable wrapper around the project's analysis and Tableau visualizations. It should explain the project, make the dashboard/story accessible and document how the data was prepared.

Detailed Project-Specific Content

- Overview page: project purpose, scope, data workflow, reported processed-record count and links to repository, dashboard and story.
- Dashboard page: responsive Tableau embed plus a direct-open link.
- Story page: Tableau Story embed plus a direct-open link.
- Methodology page: source data, transformations, SQLite/SQL role, analysis methods, testing and limitations.
- Shared layout: consistent navigation, meaningful page titles, accessible contrast, semantic HTML and a footer containing repository/source links.
- Flask: use clear routes and templates, handle missing files gracefully and avoid machine-specific absolute paths.
- HTML/CSS: ensure layout works on desktop and mobile; test keyboard navigation and link labels.
- Deployment: local execution and public hosting are different. Do not claim successful deployment unless the actual hosted application is verified.
- Integration tests: check each route, Tableau URL, embed sizing, fallback behavior and browser console/network errors.

Project References and Artifact Locations

Project: Electric Vehicle Market Performance & Insights Repository: https://github.com/manasgite54-cmd/EV-project Processed dataset: data/processed/ev_market_clean.csv Reported processed records: 299,999 Cleaning report: data/processed/cleaning_report.json Tableau Dashboard: https://public.tableau.com/views/Book1_17931030431560/EVMarketOverview?:showVizHome=no&:embed=yes Tableau Story: https://public.tableau.com/views/Book1_17931030431560/Story1?:showVizHome=no&:embed=yes Accuracy note: the record count and artifact paths above are reported by the project owner. Exact schema, source provenance, units, calculated statistics, test results, and deployment status must be checked against the repository and actual artifacts. No unsupported results, approvals, or signatures are claimed.

Status: Detailed project-specific document. Any [TO BE PROVIDED], [TO BE VERIFIED] or [TO BE CALCULATED] item requires confirmation. No supervisor approval, signature, unverified test pass or successful deployment is implied.
