# Electric Vehicle Market Performance & Insights

KPI Definitions and Calculations

**Repository:** https://github.com/manasgite54-cmd/EV-project

## Purpose and Context

Every KPI needs a definition, formula, unit, denominator, null handling and eligible record count. The dashboard should favor transparent descriptive indicators rather than unsupported market performance claims.

## Detailed Project-Specific Content

- Processed records = number of rows in the cleaned CSV. Reported value: 299,999; confirm by reading the current artifact.
- Distinct manufacturers = count of unique non-null manufacturer values after documented normalization.
- Records by model year = count grouped by model year; this is dataset representation, not annual sales.
- Category share = category row count / eligible row count × 100. State treatment of unknown categories.
- Median range = median of valid numeric range values; show unit and valid-row count.
- Median battery capacity = median of valid numeric capacity values; show unit and valid-row count.
- Median price = median of valid numeric prices; show currency, price basis and valid-row count.
- Mean customer rating = average only if the scale is numeric and comparable; show rated-record count and scale.
- Capacity-range relationship = descriptive association among valid records; confirm unit consistency and avoid causal interpretation.
- Each tile must show a clear label, formula/aggregation, unit, eligible sample size and data caveat.
- Do not call record counts sales, revenue, production or market share unless the source explicitly measures those concepts.
- All values other than the reported row count are intentionally left for calculation from the actual dataset.

## Project References and Artifact Locations

Project: Electric Vehicle Market Performance & Insights Repository: https://github.com/manasgite54-cmd/EV-project Processed dataset: data/processed/ev_market_clean.csv Reported processed records: 299,999 Cleaning report: data/processed/cleaning_report.json Tableau Dashboard: https://public.tableau.com/views/Book1_17931030431560/EVMarketOverview?:showVizHome=no&:embed=yes Tableau Story: https://public.tableau.com/views/Book1_17931030431560/Story1?:showVizHome=no&:embed=yes Accuracy note: the record count and artifact paths above are reported by the project owner. Exact schema, source provenance, units, calculated statistics, test results, and deployment status must be checked against the repository and actual artifacts. No unsupported results, approvals, or signatures are claimed.

**Status:** Detailed project-specific document. Any [TO BE PROVIDED], [TO BE VERIFIED] or [TO BE CALCULATED] item requires confirmation. No supervisor approval, signature, unverified test pass or successful deployment is implied.
