Electric Vehicle Market Performance & Insights

Limitations and Risk Register

Repository: https://github.com/manasgite54-cmd/EV-project

Purpose and Context

The main risks concern data provenance, field interpretation, sample bias, external visualization availability and reproducibility. These limitations should be disclosed in the report and user interface.

Detailed Project-Specific Content

- L-01 Source/license unclear: verify publisher, URL, access date and license before submission.
- L-02 Record grain uncertain: a record may not equal a sale, registration or unique vehicle; use record-level language unless proven otherwise.
- L-03 Price context absent: verify currency, market, date, taxes and incentives before comparing prices.
- L-04 Range/capacity units differ: document units and test standards before comparison.
- L-05 Ratings may be biased or sparsely sampled: disclose scale, review count and collection method.
- L-06 Missingness can bias subsets: report field-level missingness and eligible rows for each chart.
- L-07 Tableau Public depends on network and third-party availability: provide direct links and fallback messaging.
- L-08 Environment/path mismatch can break the application: document dependencies and use relative paths/configuration.
- L-09 Data may be stale or geographically limited: state period and coverage only after verification.
- L-10 Deployment may be unverified: separate local functionality from public hosting claims.
- Risk register fields: risk, likelihood, impact, owner, mitigation, contingency and residual risk. Likelihood/impact and owners require project-specific assignment.
- Priority actions: verify source citation/license, inspect schema/report, reconcile metrics, test routes/embeds and remove unsupported claims.
- Risk ratings, owners and acceptance: [TO BE PROVIDED].

Project References and Artifact Locations

Project: Electric Vehicle Market Performance & Insights Repository: https://github.com/manasgite54-cmd/EV-project Processed dataset: data/processed/ev_market_clean.csv Reported processed records: 299,999 Cleaning report: data/processed/cleaning_report.json Tableau Dashboard: https://public.tableau.com/views/Book1_17931030431560/EVMarketOverview?:showVizHome=no&:embed=yes Tableau Story: https://public.tableau.com/views/Book1_17931030431560/Story1?:showVizHome=no&:embed=yes Accuracy note: the record count and artifact paths above are reported by the project owner. Exact schema, source provenance, units, calculated statistics, test results, and deployment status must be checked against the repository and actual artifacts. No unsupported results, approvals, or signatures are claimed.

Status: Detailed project-specific document. Any [TO BE PROVIDED], [TO BE VERIFIED] or [TO BE CALCULATED] item requires confirmation. No supervisor approval, signature, unverified test pass or successful deployment is implied.
